# PasswordKeepR

OVERVIEW

USER STORIES:

- **Max** is an employee of a Fortune 500 company
  - He uses it to store all his passwords for different tools he uses in project management
  - Constantly using different tools
  - Client passwords need to be kept a secret and not shared
  - Must also be highly complicated and difficult as to respect clients' security
- **Edna** is old and has dementia
  - She needs passwords online to keep up with her banking, emailing her kids and grandkids, and her online bridge team at the shelter
  - Uncomfortable with technology, Password KeepR's easy user interface allows her to store and remember her passwords, as well as copy and paste them with buttons (doesn't have to right-click)
    - As a member of the elderly community, she is susceptible to scammers, and Password KeepR's secure storing gives her peace of mind from malicious attackers
- **Michael** is a student in university and can't keep track of all his passwords for his different school-related accounts and wants a safe way to store his passwords so that he only needs to remember 1.
